[attachment "MasterNutCriteriaPlan_v3.doc" deleted by Tonya Fish/R8/USEPA/US]
Hi Tina, Tonya, Ron;

At our meeting on February 12 we talked about the possibility of developing a second, short white paper, one that delves into the problems that low nutrient criteria concentrations pose for permits, variances, best available technology, etc., and the issues that we (DEQ) need clarification from EPA on.

We tabled the idea as too time consuming, but I found it was fairly fast and easy to capture the main ideas and, so, here they are presented in the attached document. The main concerns out outlined in the preamble to the flow chart. If you have questions etc. please let me know. To view the flowchart properly it must be viewed in print layout.

Thanks,

-Mike
